18. Taj has rewritten some of the EmployeeInfo Domino Web service. The public methods that correspond to the operations of the Web service used to be contained within the EmployeeInfo public class. Taj has renamed these methods and put them in a new public class called GetEmployeeInfo. .

What are some of the steps that should be taken in order for the applications that consume this Web service to be able to work?.

- A. Set the PortType class on the basics tab of the Web services properties to "GetEmployeeInfo". The consumer applications will then need to be modified as per the new WSDL..
- B. No changes are needed. Since the name of the Web service design element has not changed, and the functions and classes are public, the consumer applications will continue to work..
- C. Set the PortType class on the basics tab of the Web services properties to "GetEmployeeInfo". The next time a consumer application sends a SOAP request, the new WSDL will be returned. .
- D. Clear the PortType class on the basics tab of the Web services properties. When the Web service is saved, this field is automatically populated with the proper value, the WSDL is automatically updated, and the clients that call the Web service will reconfigure themselves automatically.WArIaLZ.
