

250-222 Practice Test

Symantec Administration of HA Solutions for Unix using VCS 4.0

250-222: Administration of HA Solutions for Unix using VCS 4.0

Practice Exam: 250-222 Exams

Exam Number/Code: 250-222

Exam Name: Administration of HA Solutions for Unix using VCS 4.0

Questions and Answers: 118 Q&As

(Symantec Certified Security program)

Exam : [250-222](#)

For candidates making preparation for the Symantec 250-222 questions and answers, what they most desire is to easily pass the 250-222 (Administration of HA Solutions for Unix using VCS 4.0) exam. ItCertHome 250-222 includes 118 questions and answers, which are collected and collated by experts of Symantec. With our 250-222 study materials, you can successfully take Symantec certification of 250-222 exam and go further on Symantec career path.

Free 250-222 Demo

we provide Symantec 250-222 demo exam for free (in PDF format) before you decide to purchase it. Thus, you can know better about the quality of our practice exam and then make your right decision.

ItCertHome Test tool's advantages:

High Quality and Value of 250-222 exam

ItCertHome Symantec Symantec Certified Security program 250-222 Practice Questions is developed and finished by Symantec technical team , cover every field of the exam . Besides, we have verified 250-222 answers, almost 100% correct.

100% Guarantee to Pass 250-222 Exam

We promise to give you FULL REFUND if you fail the Symantec Certified Security program 250-222 certification (Symantec Certified Network Associate) with the use of our ItCertHome testing engine.

250-222 Self Test Mode

ItCertHome provides a simulated and interactive environment where you can test your knowledge and skills about 250-222 to ensure enough assurance in real testing center.

Periodic Updates of ItCertHome 250-222

Once there is some change on Symantec 250-222 exam, we will update it timely, and the product you buy will be updated within 90 days for free.

Professional and Efficient Service

We offer 7*24 customer support via diverse channels: LIVE CHAT,MAIL. Expecting the communication with you about IT certification.

The Questions & Answers cover the latest real test and with all the correct answer. we promise the Q&A for **Symantec Symantec Certified Security program 250-222** examination of original title complete coverage. ItCertHome **250-222 Braindumps** Questions & Answers help you pass the exam. Otherwise, we will give you a full refund.

We promised that use ItCertHome Q&A ensure you pass the exam at your first try.

1. The Q&A are from cooperation exam center of the real original title, summarized by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A. The correctness of the Q&A is 100%, the coverage of 250-222 Q&A are more than 96%. All you need to study the whole 250-222 Q&A

before you participate the certification exam, it should be possible to easily complete the exam and pass the certification.

2. ItCertHome to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our 250-222 Q&A and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC or VUE test centers Seal. we will refund your full cost of 250-222 Q&A, absolutely guarantee you interests have no losses.(For a full refund details)

3. ItCertHome professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the 250-222 Q&A, we will update the Q&A in the first time, and provide you the download update for free.

[Symantec 250-222](#) Test belongs to one of the Symantec Certified Security program certified test, if needs to obtain the Symantec Certified Security program certificate, you also need to participate in other related test, the details you may visit the Symantec Certified Security program certified topic, in there, you will see all related Symantec Certified Security program certified subject of examination.

250-222

ItCertHome professional provide Symantec Certified Security program 250-222 the newest Q&A, completely covers 250-222 test original topic. With our complete Symantec Certified Security program resources, you will minimize your Symantec Certified Security program cost and be ready to pass your 250-222 tests on Your First Try, 100% Money Back Guarantee included!

This 250-222 PDF demo do not include the questions and answers's picture:

Exam : Symantec 250-222

Title : Administration of HA Solutions for Unix using VCS 4.0

1. VCS needs to be patched on systems running in a production environment. There are two service groups currently running in a cluster that has two systems. VCS is to be stopped on all systems in the cluster in order to apply the patch without any application downtime.

What is the proper VCS command to accomplish this?

- A. hastop all
- B. hastop all force
- C. hapause upgrade
- D. hasys -stop

Answer: B

2. The systems you need to work on are in production and you want to minimize downtime. VCS is not currently installed or configured, though an application is.

Which two tasks can be performed prior to the downtime window? (Choose two.)

- A. modify the public network interface configuration
- B. connect the Fibre Channel cable from the system to the storage switch
- C. attach the copper SCSI cable to the storage array
- D. modify the private network interface configuration
- E. test public network interfaces by disconnecting the cables

Answer: BD

3. You are planning to install both VERITAS Cluster Server and VERITAS Volume Manager. You will also be changing the application environment over the course of the next 18 months.

Increasing the number of _____ will require modification of the VCS configuration. (Choose three.)

- A. highly available applications
- B. file systems used by the highly available applications
- C. disk groups used by the highly available applications
- D. disks in the disk group used by the highly available applications

Answer: ABC

4. Which hardware component is considered key in a high availability configuration using VERITAS Volume Manager and VCS?

- A. multiple I/O paths
- B. shared memory segment definitions
- C. multiple processors
- D. Fibre Channel attached storage

Answer: A

5. You have a two-system VCS cluster with two dedicated Ethernet heartbeats and I/O Fencing enabled. What will happen if both heartbeat connections are lost simultaneously?

- A. The cluster automatically stops on both systems.
- B. All services groups are frozen on both systems.
- C. All service groups are evacuated from both systems.
- D. One system will panic, and the other will remain up and operational.

Answer: D

6. Given a service group where FailOverPolicy=Load, which VCS attribute does HAD use to determine the failover target?

- A. Capacity
- B. Load
- C. Prerequisites
- D. AvailableCapacity

Answer: D

7. Which set of commands are needed to add a resource type TypeA with a RestartLimit of 2 to a running cluster?

- A. haconf -makerw
hatype add TypeA
hatype modify TypeA RestartLimit 2
haconf dump -makero
- B. haconf makerw
hares add TypeA
hares modify TypeA RestartLimit 2
haconf dump -makero
- C. haconf makerw
hatype add TypeA
hatype set TypeA RestartLimit 2
haconf dump -makero
- D. haconf makerw
hatype modify TypeA RestartLimit 2
hatype add TypeA
haconf dump -makero

Answer: A

8. A system administrator wants to install a VCS database enterprise agent on to an active/passive cluster. Where should the database agent files be installed?

- A. on local storage on every system in the cluster
- B. on local storage on the machine designated as the active system

- C. on shared storage so that both active and passive systems will have access
- D. on shared storage with a symbolic link to the database on the active system

Answer: A

9. Which two passwords do you need to install and configure VCS with the Oracle Enterprise Agent with second level monitoring? (Choose two.)

- A. network switch
- B. administrative user
- C. cluster operator
- D. Oracle user

Answer: BD

10. A sysname file is created on one of the cluster systems.

Which two additional files need to be modified on that system? (Choose two.)

- A. llthosts
- B. gabtab
- C. gabhosts
- D. main.cf
- E. types.cf

Answer: AD

11. What is a requirement for implementing a VCS cluster?

- A. Hardware single points of failure must be isolated and eliminated.
- B. An application must be able to restart to a known state after a failure.
- C. An application must be able to run simultaneously on all clustered systems.
- D. Monitored redundant hardware components must be the same make and model.

Answer: B

12. There is a requirement for an application to remain online when a public network interface fails in a two-system VCS cluster.

Which hardware configuration is required to configure this behavior in VCS?

- A. At least two public network interfaces must be present on each system.
- B. One network interface per system will work as long as two or more switches are present.
- C. VCS will fail over the application any time any network interface fails on a system.
- D. Multiple network interfaces must be on the same controller card on each system.

Answer: A

13. What are three default behaviors of VCS? (Choose three.)

- A. migrating applications from a system on intentional system shutdown
- B. shutting down the system when an application fails on that system
- C. enabling remote access for the cluster management GUI
- D. AutoDisable the service groups on a system when that system fails

Answer: ACD

14. Which VCS utility is used to verify a configuration file and can also be used by the VCS engine to load a configuration file at run time?

- A. hacf
- B. haconf
- C. haload
- D. haverify

Answer: A

15. You are installing VCS on a new four-node cluster. You will be running the installation program from a single node.

The system administrators are concerned about system security and do not want to give you the administrative password. Instead, they want to enter the password once and then leave you alone to work.

Assuming there are no reboots into single-user mode, which two methods enable you to accomplish this? (Choose two.)

- A. telnet
- B. ftp
- C. ssh
- D. rsh
- E. RPC

Answer: CD

16. You want to install a database application in a four-node VCS cluster.

Which system configuration is NOT suitable for the cluster?

- A. SystemA
- B. SystemB
- C. SystemC
- D. SystemD

Answer: D

17. Which VCS bundled agent can be used to mirror the state of a NIC resource to another service group?

- A. Proxy
- B. Phantom
- C. IPMultiNIC
- D. MnicReflect

Answer: A

18. During review of a two-system VCS active-passive cluster installation, it is noticed that all disks are configured into a VERITAS Volume Manager disk group containing the boot disk.

Which limitation does this impose?

- A. VCS cannot manage volumes created in this disk group.
- B. Volumes in this disk group are restricted to only having two plexes.
- C. This disk group cannot be deported/imported during an application fail over.
- D. There are no limitations to having all disks in this disk group.

Answer: C

19. You have just installed VCS using the installvcs script on a two-system cluster. Now you are checking the contents of key configuration files to validate the installation.

What is the name of the command, with options, that you find in the /etc/gabtab file?

- A. gabconfig c -x
- B. gabconfig c n 2
- C. gabconfig -x
- D. gabconfig n 2

Answer: B

20. Which elements are NOT components of a base VCS installation? (Choose two.)

- A. bundled agents
- B. enterprise agents
- C. PERL
- D. GAB Drivers
- E. Clustered Volume Manager

Answer: BE
