

310-879 Practice Test

SUN SUN Certified System Support Engineer

310-879: SUN Certified System Support Engineer

Practice Exam: 310-879 Exams

Exam Number/Code: 310-879

Exam Name: SUN Certified System Support Engineer

Questions and Answers: 120 Q&As

(SUN Other Certifications)

Exam : [310-879](#)

For candidates making preparation for the SUN 310-879 questions and answers, what they most desire is to easily pass the 310-879 (SUN Certified System Support Engineer) exam. ItCertHome 310-879 includes 120 questions and answers, which are collected and collated by experts of SUN. With our 310-879 study materials, you can successfully take SUN certification of 310-879 exam and go further on SUN career path.

Free 310-879 Demo

we provide SUN 310-879 demo exam for free (in PDF format) before you decide to purchase it. Thus,you can know better about the quality of our practice exam and then make your right decision.

ItCertHome Test tool's advantages:

High Quality and Value of 310-879 exam

ItCertHome SUN SUN Other Certifications 310-879 Practice Questions is developed and finished by SUN technical team , cover every field of the exam . Besides, we have verified 310-879 answers,almost 100% correct.

100% Guarantee to Pass 310-879 Exam

We promise to give you FULL REFUND if you fail the SUN Other Certifications 310-879 certification(SUN Certified Network Associate) with the use of our ItCertHome testing engine.

310-879 Self Test Mode

ItCertHome provides a simulated and interactive environment where you can test your knowledge and skills about 310-879 to ensure enough assurance in real testing center.

Periodic Updates of ItCertHome 310-879

Once there is some change on SUN 310-879 exam, we will update it timely, and the product you buy will be updated within 90 days for free.

Professional and Efficient Service

We offer 7*24 customer support via diverse channels: LIVE CHAT,MAIL.Expecting the communication with you about IT certification.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **SUN SUN Other Certifications 310-879** examination of original title complete coverage.ItCertHome **310-879 Braindumps** Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

We promised that use ItCertHome Q&A ensure you pass the exam at your first try.

1. The Q&A are from cooperation exam center of the real original title,summaried by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A.The correctly of the Q&A is 100%, the coverage of 310-879 Q&A are more than 96%.All you need to study the whole 310-879 Q&A before you participate the certification exam,it should be possible to easily complete the exam and pass the certification.

2. ItCertHome to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our 310-879 Q&A and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC or VUE test centers Seal. we will refund your full cost of 310-879 Q&A, absolutely guarantee you interests have no losses.(For a full refund details)

3. ItCertHome professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the 310-879 Q&A, we will update the Q&A in the first time, and provide you the download update for free.

SUN 310-879 Test belongs to one of the SUN Other Certifications certified test, if needs to obtain the SUN Other Certifications certificate, you also need to participate in other related test, the details you may visit the SUN Other Certifications certified topic, in there, you will see all related SUN Other Certifications certified subject of examination.

310-879

ItCertHome professional provide SUN Other Certifications 310-879 the newest Q&A, completely covers 310-879 test original topic. With our complete SUN Other Certifications resources, you will minimize your SUN Other Certifications cost and be ready to pass your 310-879 tests on Your First Try, 100% Money Back Guarantee included!

This 310-879 PDF demo do not include the questions and answers's picture:

Exam : SUN 310-879

Title : Sun Certified Partner Field Engineer, level 3

1. A customer has forgotten the ALOM password for a user on a Sun Fire V210 system. The system is up and running. How can you reset a forgotten ALOM from the OS?

- A. # password
- B. # userpassword [username]
- C. # scadm userpassword [username]
- D. ALOM passwords cannot be reset from the OS.

Answer: C

2. Several previously working Sunblade 150 and associated peripheral cabinets have been moved to another part of the building. Upon powerup, one system is now exhibiting this error message:

Resetting SCSI bus data overrun - got too much data from target (4,0)

WARNING Target 4 reducing synch transfer rate

SCSI bus reset

What is the most likely cause of this problem?

- A. Faulty cable connector
- B. Faulty network cable at 4,0
- C. Mirrored root disk needs resynching
- D. Fiber optic cable not seated correctly
- E. Wrong peripheral cabinet has been reconnected

Answer: A

3. A customer firewall is blocking ssh logon access to a newly installed desktop server.

What port(s) need to be opened on the firewall to allow ssh traffic on the default port(s)?

- A. 22
- B. 443
- C. 20 and 21
- D. 22 and 23

Answer: A

4. After replacing the root-disk on a Sun Fire V490, the device path needs to be updated with the new disk WWN: w21000011c63f0c94. It is necessary to update the nvramrcdevalias entries to the new device path so the system will be able to boot from the replaced root-disk.

From the OS, how should you update the nvram alias for root-disk?

- A. ok>setenv boot-device root-disk
- B. ok>nvalias root-disk /pci@8,600000/SUNW,qlc@2/fp@0,0/ssd@w21000011c63f0c94,0:a
- C. ok> devalias root-disk /pci@8,600000/SUNW,qlc@2/fp@0,0/ssd@w21000011c63f0c94,0:a
- D. #eeprom devalias root-disk /pci@8,600000/SUNW,qlc@2/fp@0,0/ssd@w21000011c63f0c94,0:a
- E. #eeprom nvramrc='devalias root-disk /pci@8,600000/SUNW,qlc@2/fp@0,0/ssd@w21000011c63f0c94,0:a'

Answer: E

5. A customer has installed a new disk drive in the upper left slot of their Sun Fire V240 (disk 2). They are unable to see the disk from the operating system. How can you make the disk visible to Solaris?

- A. Use boot -r to reconfigure the system.
- B. Run format at the operating system level.
- C. Reseat the drive and reboot after power down.
- D. Perform a boot -av to see if the system recognises the disk.

Answer: A

6. A customer's system has been running slowly, and the /opt/SUNWsrsp/ bin/srsproxy process has been identified as the problem. Its process ID is 186. What command should you use to terminate this process?

- A. killall
- B. proc kill 186
- C. pkill srsproxy
- D. pskill srsproxy

Answer: C

7. You have completed an EIS installation. The customer asks for a copy of the EIS CD-ROM in case they need to rebuild the same system at a later date. What should you do?

- A. Advise the customer to order an official copy.
- B. Give the customer the discs as part of the installation.
- C. Refuse politely, the discs are not available to customers.
- D. Offer to make copy of the discs which you will pass on later.

Answer: C

8. A customer has a mirrored Sun Fire V880 with Volume Manager 3.2 under Solaris 9. The disk system has a WWN 21000004cf62d684. The mirror disk has a WWN 21000004cf62109c. The machine reboots in a loop with this message:

```
Cannot mount root on /pci@8,600000/SUNW,qlc@2/fp@0,0/disk@w21000004cf62d684,0:a
fstype ufs
```

```
panic[cpu2]/thread=10408000: vfs_mountroot: cannot mount root
```

The boot device is configured as follows:

Click the Exhibit button.

What command should you run to reboot as soon as possible?

- A. boot -ars
- B. devfsadm -r
- C. After replacing the drive, run the command drvconfig
- D. boot /pci@8,600000/SUNW,qlc@2/fp@1,1/disk@w21000004cf62109c ,0:a

Answer: D

9. You are installing a StorEdge T3b Array and have already entered the T3 module name. According to the EIS checklist, you are required to enter the blocksize. What is the block size required by EIS?

- A. 4k
- B. 16k
- C. 32k
- D. 64k

Answer: C

10. A customer has had a number of I/O problems with the primary controller on a Sun StorEdge 3510 with two controllers. Back end support requests that you remove the primary RAID Controller to isolate the problem. How can you identify which of the controllers is the primary?

- A. The SFP link status LED is off.
- B. The SFP link status LED is green.
- C. The I/O controller module LED is solid green.
- D. The I/O controller module LED is blinking green.

Answer: D

11. A customer reports that over the last few months there have been multiple occasions when power supply 0 (PS0) on their Sun Fire V440 has recorded errors in the var/adm/messages file. Due to the multiple errors, PTS has determined that the device should be replaced. All LED indicators on the system are normal.

What command, if any, at the ALOM prompt should you run to prepare the power supply for replacement?

- A. `sc> offline ps0`
- B. `sc> poweroff ps0`
- C. `sc> removefru ps0`
- D. No command is necessary because the power supplies are redundant.

Answer: C

12. You are jumpstarting a machine across a customer network from your jumpstart server. During the Solaris startup, the hostname of your jumpstart client machine has changed from what you expected. What is the most probable explanation for this?

- A. There is another jumpstart server on the same network.
- B. A jumpstart server on a different network has responded to your client.
- C. There is an old Solaris image on the machine with the displayed hostname.
- D. This is normal, the default jumpstart client hostname is always initially different.

Answer: A

13. You are doing the initial platform setup on a Sun StorEdge T3+ array. The customer wants to create a LUN with a Blocksize = 64k. What command serves to define the blocksize parameter of the array?

- A. `set`
- B. `sys`
- C. `fru`
- D. `vol`

Answer: B

14. On a Sun Fire E2900 server, you modified the LOM network to 'static' from 'dhcp' using the `setupnetwork` command. After answering all the questions, the LOM configuration came back to the `lom>` prompt. You type `shownetwork` and notice the network setting is still 'dhcp' instead of 'static'. Which is most likely the problem?

- A. 'Static' is an invalid option.
- B. Your LOM revision level is too low.
- C. LOM setup aborted before you finished.
- D. You need to use the `resetsc` command after making the change.

Answer: D

15. You are upgrading a Sun Fire V880 from 2 to 6 disks. You are currently at the root prompt. What command should you run after installing the disks to allow the system to access them?

- A. init 6
- B. format
- C. reboot
- D. test-all
- E. devfsadm

Answer: E

16. You have been asked to brief the customer regarding the power configuration of a Sun Fire 6800 for compliance with Sun Fire Midframe Server Configuration Best Practices.

The Sun Fire 6800 power configuration is as follows:

1. 2 redundant transfer units (RTU)
2. Each RTU contains 2 redundant transfer switches (RTS)

Which three should you tell the customer about best practices for power configuration? (Choose three.)

- A. If one RTS fails, the RTU will shutdown.
- B. Both RTS in an RTU should be connected to the same power source.
- C. Both RTS in each RTU do not load share and are in active-standby mode.
- D. Both RTS in each RTU perform load sharing and are in active-active mode.
- E. The Sun Fire rack has 2 RTUs that should be connected to a single power source.
- F. The Sun Fire rack has 2 RTUs that each should be connected to a separate power source.
- G. The RTS will attempt to switch incoming power to a second RTS module in the RTU in the event of a brownout or power failure.

Answer: CFG

17. You have replaced a failed RTS on a Sun Fire 6800. While packing your tools you hear a loud mechanical lunk. On investigation, you discover the righthand RTS has failed over to the lefthand RTS.

What should you do?

- A. Replace the other RTS unit as these normally always fail in pairs.
- B. Suspect a version mismatch between the original and your replacement RTS.
- C. Nothing, the machine will always use the functioning left-hand RTS when available.
- D. Ask the customer to connect to the System Controller and enable the replacement RTS.

Answer: C

18. You are installing SRS NetConnect so that a customer can monitor their Sun server and storage systems. What provider component is NOT catered by the Sun NetConnect 3.2 installation script?

- A. Event
- B. Storage
- C. Configuration
- D. Hardware alarm

Answer: B

19. You are configuring the name service on a Sun Fire 4800. What file defines the name service the system is using?

- A. /etc/hosts
- B. /etc/resolv.conf
- C. /etc/name_to_major
- D. /etc/nsswitch.conf

Answer: D

20. You want to mount a filesystem provided by an NFS server (hostname server). This will allow the project managers to access the project filesystem (/projects). What file should you edit on the client, and what entry should you make to ensure it is mounted every time the system is booted?

- A. /etc/dfs/dfstab

share -F nfs /projects
 B. /etc/vfstab
 share -F nfs /projects
 C. /etc/dfs/dfstab
 dfshare -F nfs /projects
 D. /etc/vfstab
 server:/projects - /projects nfs - yes -
 Answer: D
