Title : IIUC Implementing Cisco IOS Unified Communications (IIUC)

1. A SIP Trunk is a logical connection between an IP PBX and a Service Provider's application servers that allows voice over IP traffic to be exchanged between the two. When a call is placed from an internal phone to an external number, the PBX sends the necessary information to the SIP Trunk provider who establishes the call to the dialed number and acts as an intermediary for the call. All signaling and voice traffic between the PBX and the provider is exchanged using SIP and RTP protocol packets over the IP network. Which two statements about SIP trunk are true?

- A. A SIP trunk configuration is mandatory for a UC500 device.
- B. A SIP trunk is needed for internet access
- C. A SIP trunk is needed only for voice if you are planning on using VoIP through a service provider.

13. Power over Ethernet (PoE) is the ability for the LAN switching infrastructure to provide power over a copper Ethernet cable to an endpoint (Powered Device). This capability, once referred to as "inline power", was originally developed and first delivered by Cisco in 2000 to support the emerging IP Telephony deployments. IP Telephones, like desktop PBX phones, need power for their operation and Power over Ethernet enables scalable and manageable power delivery and simplifies deployments of IP Telephony. As Wireless networking emerged, Power over Ethernet was also used to power these devices to allow for deployments in locations where local power access did not exist. While IP telephones and wireless access points are the most intuitive uses for PoE, the advent of 802.3af standardization of PoE opens the door to a new generation of networked-attached devices such as video cameras, point-of-sale devices, security access control (card scanners), building automation and industrial automation just to name a few. When a Cisco switch supply PoE to an IP phone?

- A. whenever switch and IP phone are Cisco products.
- B. when Cisco switch supports prestandard PoE and the IP phone supports 802.3af.
- C. when Cisco switch and IP phone both support a common PoE method.
- D. Only when both the switch and IP phone use 802.3af PoE.
