

e20-512 Practice Test

EMC business continuity specialist exam for storage admins

e20-512: business continuity specialist exam for storage admins

Practice Exam: e20-512 Exams

Exam Number/Code: e20-512

Exam Name: business continuity specialist exam for storage admins

Questions and Answers: 240 Q&As

(EMC Certification)

Exam : [e20-512](#)

For candidates making preparation for the EMC e20-512 questions and answers, what they most desire is to easily pass the e20-512 (business continuity specialist exam for storage admins) exam. ItCertHome e20-512 includes 240 questions and answers, which are collected and collated by experts of EMC. With our e20-512 study materials, you can successfully take EMC certification of e20-512 exam and go further on EMC career path.

Free e20-512 Demo

we provide EMC e20-512 demo exam for free (in PDF format) before you decide to purchase it. Thus,you can know better about the quality of our practice exam and then make your right decision.

ItCertHome Test tool's advantages:

High Quality and Value of e20-512 exam

ItCertHome EMC EMC Certification e20-512 Practice Questions is developed and finished by EMC technical team , cover every field of the exam . Besides, we have verified e20-512 answers,almost 100% correct.

100% Guarantee to Pass e20-512 Exam

We promise to give you FULL REFUND if you fail the EMC Certification e20-512 certification(EMC Certified Network Associate) with the use of our ItCertHome testing engine.

e20-512 Self Test Mode

ItCertHome provides a simulated and interactive environment where you can test your knowledge and skills about e20-512 to ensure enough assurance in real testing center.

Periodic Updates of ItCertHome e20-512

Once there is some change on EMC e20-512 exam, we will update it timely, and the product you buy will be updated within 90 days for free.

Professional and Efficient Service

We offer 7*24 customer support via diverse channels: LIVE CHAT,MAIL.Expecting the communication with you about IT certification.

The Questions & Answers cover the latest real test and with all the correct answer.we promise the Q&A for **EMC EMC Certification e20-512** examination of original title complete coverage.ItCertHome **e20-512 Braindumps** Questions & Answers help you pass the exam. Otherwise,we will give you a full refund.

We promised that use ItCertHome Q&A ensure you pass the exam at your first try.

1. The Q&A are from cooperation exam center of the real original title,summaried by our professional team and collated by senior IT lectured in co-training center to make sure the professional quality of the Q&A.The correctly of the Q&A is 100%, the coverage of e20-512 Q&A are more than 96%.All you need to study the whole e20-512 Q&A before you participate the certification exam,it should be possible to easily complete the exam and pass the certification.

2. ItCertHome to all the Q&A, we promised "do not pass the exam give you a full refund". If you buy our e20-512 Q&A and did not pass the exam at the first try. You can take the examination report card that stamped with PROMETRIC or VUE test centers Seal. we will refund your full cost of e20-512 Q&A, absolutely guarantee you interests have no losses.(For a full refund details)

3. ItCertHome professional IT Q&A vendors, we provide well after-sale service. To all the customers buy the Q&A, we provide track service. when you buy the Q&A with in one year. you can enjoy the upgrade Q&A service for free. If in this period, the certified test center change the e20-512 Q&A, we will update the Q&A in the first time, and provide you the download update for free.

[EMC e20-512](#) Test belongs to one of the EMC Certification certified test, if needs to obtain the EMC Certification certificate, you also need to participate in other related test, the details you may visit the EMC Certification certified topic, in there, you will see all related EMC Certification certified subject of examination.

e20-512

ItCertHome professional provide EMC Certification e20-512 the newest Q&A, completely covers e20-512 test original topic. With our complete EMC Certification resources, you will minimize your EMC Certification cost and be ready to pass your e20-512 tests on Your First Try, 100% Money Back Guarantee included!

This e20-512 PDF demo do not include the questions and answers's picture:

Exam : EMC E20-512

Title : Symmetrix Business Continuity Specialist for Storage Admins

1. When using Open Replicator to do a Hot Pull without the donor_update option set, what is the result of terminating the session before it is complete?

- A. Requests for data not yet copied will cause a priority retrieve of the data from the remote volume.
- B. Session will run to completion before actually terminating.
- C. The local volume will revert to its state prior to the Hot Pull.
- D. There is data loss on the remote volume.

Answer: D

2. What are the steps for the administration of storage in an EMC Replication Manager environment?

- 1.Array configuration
- 2.Storage pools
- 3.Storage discovery
- 4.Array discovery
- 5.Include storage

- A. 3, 1, 4, 5, 2
- B. 3, 4, 1, 5, 2
- C. 4, 1, 3, 5, 2
- D. 4, 3, 1, 5, 2

Answer: C

3. The snap has been mounted for a data validation check. Which statement applies to the TimeFinder/Snap save device?

- A. Can be used when configuring a multi-hop SRDF/AR environment
- B. Save devices must be the same capacity
- C. Used as cache-only virtual device in SRDF/A
- D. Used to hold changes made to the source after snap activation

Answer: D

4. What can happen if BCV copies of database log and data volumes are created without using a consistent split while the database is running?

- A. Database inconsistencies can occur
- B. Database integrity is assured with Engineuity Consistency Assist (ECA) technology
- C. The database application can block an I/O while waiting for the split operation to occur
- D. The split may never finish due to database inconsistency

Answer: A

5. What does a PowerPath pseudo-device represent?

- A. A logical path that leads to a single physical device
- B. A logical path set that leads to multiple physical devices
- C. A physical path that leads to multiple logical devices
- D. A path set that leads to a single logical device

Answer: D

6. The customer has experienced a transient network failure on their SRDF links. What is the Star state after the failure?

- A. Cleanup
- B. Disconnected
- C. PathFail
- D. Reset

Answer: C

7. Click on the Exhibit Button.

Using the SRDF/Star configuration, what would Star automation provide in the case of a Site 1 failure?

- A. Convert R2s to R1s of Site 2 and Site 2 to Site 3 differential resync
- B. Convert R2s to R1s of Site 2 and Site 2 to Site 3 full resync
- C. Site 2 to Site 3 differential resync
- D. Site 3 to Site 2 full resync

Answer: A

8. How does Engineuity Consistency Assist (ECA) differ from PowerPath?

- A. ECA and PowerPath I/O suspensions do not differ from each another.
- B. ECA supports I/O suspension for hot splits while PowerPath does not.
- C. ECA suspends I/O at the host level while PowerPath suspends I/O at the Symmetrix level.
- D. ECA suspends I/O at the Symmetrix level while PowerPath suspends I/O at the host level.

Answer: D

9. What is an advantage of using Open Replicator compared to the SRDF family of replication products?

- A. When a zero data loss solution is required
- B. When the environment contains a heterogeneous mixture of storage arrays
- C. When the environment contains a homogenous set of storage arrays
- D. When the environment contains servers with sufficient processor and memory

Answer: B

10. A customer requests that you create a user account for administering jobs and storage pools in EMC Replication Manager, but without controlling the storage array itself.

What is the required account type that will satisfy only these operations?

- A. Database Administrator
- B. Operator
- C. Power DBA
- D. Power User

Answer: C

11. Click on the Exhibit Button.

Which Open Replicator operations can be performed between the DMX and third-party array with the architecture displayed?

- A. Cold and Hot Push and Pull
- B. Cold Push and Pull
- C. Hot Push and Pull
- D. None; all FA ports must be zoned to the target array

Answer: B

12. What is the purpose of the half delete action in SRDF/Star?

- A. Used to dissolve RDF relationships when a partner device is unavailable
- B. Used to initiate a Star recovery procedure
- C. Used to reset the first two mirror positions to fully invalid
- D. Used to reverse the data flow after a link failure

Answer: A

13. Click on the Exhibit Button.

A database server has its logs stored on a volume on the log source Symmetrix and its data stored on a volume on the data source Symmetrix.

Both source Symmetrix frames replicate data to the target Symmetrix at the disaster recovery site. There are two device groups that have been defined: one group for the data volume on the data source Symmetrix and one for the log volume on the log source Symmetrix.

What happens if the SRDF links between the log source Symmetrix and the target Symmetrix were to fail?

- A. An SRDF failover would be initiated on all volumes and processing would automatically be switched over to the disaster recovery Site.
- B. The data in the database becomes inconsistent at the disaster recovery site.
- C. The R1 volumes in the log source Symmetrix would become write-disabled to the database server.
- D. The R2 data in the database remains consistent because Engineuity Consistency Assist technology would ensure data consistency.

Answer: B

14. A customer would like to create a point-in-time copy of the data for development purposes. The customer environment is not performance-sensitive. The customer would like to access the point-in-time copy at 9 A.M. The amount of time required to copy the data from the source to the target is 60 minutes and application downtime is not available. Which solution is recommended?

- A. Use TimeFinder/Clone to create and activate a clone with the background copy (-copy) option at 8 A.M.
- B. Use TimeFinder/Clone to create a clone with the background copy (-copy) option at or before 8 A.M. Activate the clone at 9 A.M.
- C. Use TimeFinder/Clone to create a clone using the deferred copy mode (default) prior to 9 A.M. Activate the clone with the consistent option at 9 A.M.
- D. Use TimeFinder/Clone to create a clone with the Precopy (-precopy) option at or before 8 A.M. Activate the clone at 9 A.M.

Answer: C

15. If terminating a TimeFinder/Snap copy session, what is the effect on the target host's ability to access data on the vdev?

- A. By issuing the -symforce option, the data is available to the target host.
- B. The hold on the target device is removed while pairing information remains on the Symmetrix.
- C. The information is no longer available on the virtual device.
- D. The information is still available on the virtual device to the target host.

Answer: C

16. You have created an EMC Replication Manager job to replicate your SQL Server database. You now want to delegate the day-to-day management of this job to another user with Database Administrator privileges within Replication Manager. This user complains that they are unable to access the job you created.

What must you do to enable your Database Administrator to access this job?

- A. Grant the user access to the database on SQL Server.
- B. Manually add the user account to the job.
- C. Recreate the SQL Server job.
- D. Upgrade the user's privileges to Power DBA.

Answer: B

17. Which statement describes a benefit for using Replication Manager?

- A. Automates concurrent replication between multiple storage arrays
- B. Facilitates quick, frequent, and non-disruptive backups
- C. Mounts multiple replicas to the same mount point
- D. Uses HP StorageWorks RAID technology to automate restore operations

Answer: B

18. What is the correct sequence of events when a synchronous write occurs in SRDF/S?

1. Host issues a write I/O
2. Remote Symmetrix acknowledges receipt of write
3. Write is transmitted to remote Symmetrix cache
4. Write is received in cache at source Symmetrix
5. Source Symmetrix acknowledges write completion to host

- A. 1, 3, 2, 4, 5
- B. 1, 4, 3, 2, 5
- C. 1, 4, 5, 3, 2
- D. 1, 5, 3, 4, 2

Answer: B

19. When performing LUN masking operations to support Open Replicator, what must be done to ensure that data can be accessed between two Symmetrix systems?

- A. Grant device access to the WWN of the controlling FA ports for the remote devices on the remote FA ports
- B. Grant device access to the WWN of the host HBA ports for the remote devices on the controlling FA ports
- C. Grant device access to the WWN of the host HBA ports for the remote devices on the remote FA ports
- D. Grant device access to the WWN of the remote FA ports for the remote devices on the controlling FA ports

Answer: A

20. PowerPath PPME with Open Replicator is planned for use in a migration of 172 LUNs. The source array is a Symmetrix 8830; the target array is a DMX-3.

For PPME-enabled migrations using Open Replicator, what is the configurable maximum number of concurrent replication sessions that can be supported in this configuration?

- A. 16
- B. 128
- C. 256
- D. 512

Answer: D
